

I urge you to reject NAB's petition 04-160.
I am a customer of XM radio. Although my area does not yet have weather and traffic reports, I am anxiously awaiting the start of this service. XM provides variety and quality not available elsewhere, and I do not believe that it should be up to the NAB as to what I can hear. I believe in competition, and traditional AM and FM stations are not providing the service I want.

Thank you,

Phil Greeves
